- 11. Backup & Security**

This document describes all modules and features available in the Current Link ERP system.

1. Dashboard & Overview

The main dashboard provides a real-time overview of the entire business at a glance.

Dashboard Features

- Summary cards: Total Drivers, Vehicles, Active Vehicles, Supplier Balance, Pending Salaries, Active Customers
- Global cross-module search across all data
- Real-time in-app notifications (info, warning, error, success)
- Quick navigation to all modules
- Company profile with logo and branding

Authentication & Access Control

- Admin login with CSRF protection and rate limiting
- Field Staff portal (separate login for field technicians)
- Supplier portal (suppliers can view their own data)
- Technician portal (technicians can submit jobs and papers)
- Role-based access control throughout the system

2. Fleet Management

Complete vehicle lifecycle management with 33+ vehicle types, linked Head-Trailer system, and real-time tracking.

2.1 Vehicle Management

Feature	Description
Vehicle CRUD	Add, edit, view, delete vehicles with 33 types (tractors, trailers, tankers, trucks, buses, cranes, excavators, etc.)
Vehicle Profile	Comprehensive profile page with tabs: Overview, Driver, Jobs, Maintenance, Fuel, Parts, Documents
Vehicle Categories	Head, Trailer, and custom categories with sub-types
Vehicle Status	Active/Inactive status tracking with filter tabs
Head-Trailer Linking	Link trailers to head vehicles with link types (Flat, Tank, Lowbed, etc.)
Linked Vehicle Management	Direct link/unlink/change from vehicle profile page
Custom Fields	"Type your own" option for all dropdown fields (vehicle type, ownership, category, etc.)
Partner Management	Partnership ownership with percentage splits
Vehicle Search	Search by plate number, type, model, or driver name

2.2 Maintenance Jobs

Feature	Description
Job Submission	Field staff submit maintenance jobs with descriptions and photos
Admin Direct Entry	Admin can add jobs directly for any vehicle
Approval Workflow	Pending → Approved/Rejected status tracking
Bulk Approve	Approve all jobs at once or per-staff batch approval
Photo Attachments	Upload and view job photos with thumbnail preview
Job History	Complete maintenance history per vehicle

2.3 Maintenance Papers

Feature	Description
Paper Tracking	Multi-item maintenance papers with line items
Bulk Creation	Create multiple papers from field staff submissions

Tax Modes	Tax Invoice / Without Tax selection per paper
Supplier Linking	Link papers to suppliers with TRN and bill numbers
Settlement	Track paper settlements and payments

2.4 Fuel Management

Feature	Description
Fuel Entries	Record fuel purchases per vehicle (single + bulk multi-vehicle)
Fuel Reports	PDF fuel reports with date/vehicle filters
Fuel Supplier Statement	Statement of account for fuel suppliers
VAT Management	Quick VAT tracking for fuel purchases

2.5 Field Staff

Feature	Description
Staff Profiles	CRUD with photo, username/password for portal access
Staff Jobs	View all jobs submitted by each staff member
Staff Papers	View all maintenance papers by staff
Staff Advances	Track advances given to field staff
Cash Receipts	Record cash receipts from staff
Date/Vehicle Filters	Filter staff data by date range or vehicle
PDF Exports	Export staff reports, advances, and jobs as PDF

3. HR & Employee Management

Full human resource management system for drivers, operators, and staff.

3.1 Employee Master

Feature	Description
Employee CRUD	Add, edit, view employees with types: Driver, Crane Operator, Field Staff, Helper, Accountant, etc.
Employee Types	Multiple employee categories with status tracking
Search & Filter	Search by name, ID, department, status, or assigned vehicle
Restore Deleted	Restore employees from soft delete (technicians table)
Excel Export	Download employee list as Excel spreadsheet
PDF Export	Download employee list as formatted PDF
Photo Management	Employee photo upload and display

3.2 Document Management

Feature	Description
Employee Documents	Upload and manage employee documents (visa, license, passport, etc.)
Expiry Tracking	Track document expiry dates with color-coded status badges
Thumbnail Generation	Auto-generate thumbnails for uploaded documents
ZIP Export	Download all documents as a ZIP archive

4. Salary & Payments

Complete payroll system with FIFO advance deduction, salary cards, and payment tracking.

4.1 Salary Management

Feature	Description
Salary Dashboard	Month-wise status view: Paid, Unpaid, Pending, No Record
Monthly Salary Store	Store and edit monthly salary with basic, OT, personal vehicle, prorata calculations
Salary Slip Generation	Generate salary slips with FIFO advance deduction logic
Salary Card PDF	Compact salary card format perfect for WhatsApp sharing
Deduction Statement	Detailed deduction statement PDF per employee
Delete Salary Slip	Delete salary slip with automatic FIFO reversal
OT Calculation	Overtime calculation based on work hours

4.2 Employee Kata (Advance Tracking)

Feature	Description
Monthly Kata	Track advances, deductions, and remaining balance per month
Deduction History	Complete history of all deductions applied
Balance Tracking	Running balance of outstanding advances
Kata PDF	Generate printable kata statement

4.3 FIFO Deduction Logic

The system uses FIFO (First In, First Out) logic for salary deductions. When a salary slip is generated, advances are deducted starting from the oldest transaction line first. This ensures fair and accurate deduction tracking.

5. Supplier Management

Multi-mode supplier management supporting Online, Cash, Managed, and Partnership operations.

5.1 Four Supplier Modes

Feature	Description
Online (Normal)	Traditional supplier with assets, timesheets, vouchers, payments — full billing cycle
Cash	Cash-based trips, debits, payments with auto-voucher PDF generation
Managed	Company-managed supplier operations with full control
Partnership	Partnership split calculations, expense tracking, profit distribution

5.2 Online Supplier Features

Feature	Description
Assets (Vehicles)	Register supplier vehicles with rate basis and shift mode
Timesheets	Record work timesheets auto-linked to vouchers
Invoice Intake	Receive and record supplier invoices (by hand entry)
Voucher Generation	Generate billing vouchers from timesheets/submissions
Payment Processing	Record payments against vouchers with auto-sync balance
Statement of Account	View and download SOA with running balance
Partnership Entries	Track expenses, shifts, and profit splits
Kata (Cash/Loan)	Track trips, debits, payments, and balance for cash suppliers

5.3 Supplier Documents & PDFs

Feature	Description
LPO (Local Purchase Order)	Create and download LPO documents with line items
Quotation Management	Create quotations with line items, VAT, and file upload
Payment Voucher	Generate payment voucher PDFs
Cheque Print	Print cheque view for payments
Statement of Account PDF	Full SOA with running balance as PDF
Cash Supplier Kata PDF	Cash supplier kata statement as PDF
Partnership Statement	Partnership statement PDF with expense splits

5.4 Supplier Portal

Feature	Description
Self-Service Portal	Suppliers can log in and view their own data
Inquiry System	Suppliers can submit inquiries/questions
Registration Requests	New suppliers can self-register for admin approval
Approve/Reject/Convert	Admin can approve, reject, or convert registrations to parties

6. Customer Management

Full CRM with invoicing, contracts, quotations, and NMDC-format billing.

6.1 Customer Master

Feature	Description
Customer CRUD	Add, edit, view customers with auto-generated codes (CUS-XXXX)
Logo Upload	Upload customer company logo
TRN & Trade License	Store TRN number and trade license details
Dashboard	Total customers, receivables, recent invoices/payments, monthly trend, top customers

6.2 Invoicing

Feature	Description
Standard Invoicing	Create and manage standard invoices with line items
NMDC Format	Equipment-based billing with plant/reg/hours and monthly rate conversion
Invoice PDF	Download invoice as PDF (two layouts: standard + NMDC premium)
Credit Notes	Issue credit notes against invoices
Invoice History	Complete invoice history per customer

6.3 Customer Documents

Feature	Description
Contracts	Create and manage customer contracts
Quotations	Create quotations with line items and VAT
LPOs	Local Purchase Orders with file upload and service order linking
Service Orders	Track service orders linked to LPOs
Statement of Account	Full SOA with invoices, payments, credit notes, and balance
Tabreed Tripsheets	Specialized tripsheet management for Tabreed projects

7. Documents Management

Centralized document storage with Mulkiya tracking, thumbnails, and expiry alerts.

Feature	Description
Document Upload	Upload documents with categories, expiry dates, and notes
Mulkiya Documents	Vehicle Mulkiya tracking with expiry status (Valid / Expiring Soon / Expired)
Thumbnail Generation	Auto-generate document thumbnails using PIL image processing
PDF Preview	Preview PDF documents directly in the browser
Vehicle Documents	Per-vehicle document storage (Mulkiya + other documents)
Employee Documents	Per-employee document storage (visa, license, passport, etc.)
ZIP Export	Download all documents as a ZIP archive
Flip Card Preview	Visual flip-card preview for Mulkiya documents on vehicle profile

8. Financial Tools

Built-in financial management tools for fund tracking, loans, annual fees, and banking.

8.1 Owner Fund

Feature	Description
Fund Entries	Track owner fund entries (cash/bank transfer)
PDF Report	Generate owner fund report as PDF

8.2 Annual Fees

Feature	Description
Fee Tracking	Track annual fees: Visa, Insurance, Mulkiya, Fine, Vehicle, Other
Party Cards	Visual party cards with progress bars showing collection percentage
Donut Chart	Summary donut chart showing total/paid/due at a glance
Search & Filter	Search parties by name, filter by Has Dues / Fully Paid
Receipt PDF	Generate annual fee receipt as PDF
SOA PDF	Generate Statement of Account as PDF
Collapsible Register	Collapsible fee register showing all entries
Add Fee Entry Modal	Modal form for adding/editing fee entries

8.3 Loans

Feature	Description
Loan Tracking	Track loans given and recovered
Party Profiles	Visual party cards with recovery progress bars
Donut Chart	Summary donut chart showing given/recovered/outstanding
Search & Filter	Search parties, filter by Has Balance / Cleared
Register Party	Register new loan parties with contact details
SOA PDF	Generate loan Statement of Account as PDF

8.4 Bank Transactions

Feature	Description
---------	-------------

Transaction Tracking	Record deposits, withdrawals, and transfers
Cheque Management	Track cheque payments and status
ATM Report	ATM transaction report as PDF

9. Reports & PDF Generation

Over 25 built-in PDF report generators covering every aspect of the business.

Feature	Description
Salary Slip PDF	Individual salary slip with deduction breakdown
Salary Card PDF	Compact salary card format for WhatsApp sharing
Kata PDF	Driver advance/deduction statement
Owner Fund PDF	Owner fund entry report
Timesheet PDF	Driver work timesheet
Fuel Report PDF	Fuel purchase report with date/vehicle filters
Field Staff Vehicle Report	Vehicle-wise field staff activity report
Staff Advances PDF	Staff advance tracking report
Staff Jobs PDF	Maintenance jobs report per staff
Employee List PDF	Complete employee roster
ATM Report PDF	ATM transaction report
Tax Invoice PDF	Tax invoice with VAT
LPO PDF	Local Purchase Order document
Quotation PDF	Customer quotation with line items
Payment Voucher PDF	Supplier payment voucher
Supplier SOA PDF	Statement of Account for suppliers
Cash Supplier Kata	Cash supplier kata statement
Partnership Statement	Partnership expense split statement
Annual Fee Receipt	Annual fee receipt
Annual Fee SOA	Annual fee Statement of Account
Loan SOA	Loan Statement of Account
Deduction Statement	Detailed deduction statement per employee

10. AI Assistant

Built-in AI assistant powered by Google Gemini for natural language database queries.

Feature	Description
Natural Language Queries	Ask questions in plain English and get instant answers from the database
Chat Widget	Floating chat widget accessible from any page
Example Queries	"How many active vehicles?", "Show pending salaries", "List all drivers"
Smart SQL Generation	AI automatically converts your question to SQL and returns results

Example Questions You Can Ask

- How many vehicles are currently active?
- Show me all employees in the Driver department
- What is the total outstanding salary?
- List all suppliers with their balances
- Which vehicles have expiring Mulkiya?
- Show me all fuel entries for this month
- What is the total receivable from customers?

11. Backup & Security

Automated backup system with multiple tiers and PC mirror sync.

Feature	Description
Daily Backup	Automatic daily database backup (keeps last 7 days)
Weekly Backup	Full ZIP backup including generated files (keeps last 4 weeks)
Monthly Backup	Full ZIP backup with metadata (keeps last 12 months)
PC Mirror Sync	Nightly end-of-day copy with fresh database snapshot for backup PC
Supplier Data Backup	Per-supplier JSON + CSV backup in ZIP archive
Backup Status	View disk space, latest backups, and mirror sync status
Auto PDF Generation	Auto-generate supplier statement PDFs after key actions

Security Features

- CSRF protection on all forms
- Rate limiting on login attempts
- Role-based access control (Admin, Field Staff, Supplier, Technician)
- Password-protected portals
- Audit logging for critical actions
- Session management with automatic timeout
